

Rail K=5: adopted vs padded-window robustness check (both at the converged optimum)
ARI = 0.8847 · 16 of 404 stations change cluster (4.0%) · cluster ids Hungarian-matched so colours correspond

ADOPTED — native windows, 344 features, K=5

ROBUSTNESS — all days padded to 18:00-05:00, 440 features, K=5
